11 Springwood St, Mount Gravatt East

SUMMARY

Junior Front-End Developer with a Diploma in Web Development from a high level Bootcamp in Iran. I completed the Masters in Civil Engineering in 2017. Due to the strong interest in programming I passed a high level bootcamp in Front-End Development and worked on a series of projects like designing online shops from scratch using HTML5, JavaScript and React.JS. I am so excited to continue my interest to become a senior web developer working on tech industry in Australia.

SKILLS

- React.JS
- CSS3
- JavaScript
- HTML5
- SASS
- Node.JS
- jQuery
- Git
- Ajax
- NPM
- Bootstrap
- WordPress

PROJECTS

As a member of bootcamp we designed a series of websites including online shop, portfolio, etc. using different sets of language and libraries from HTML, CSS and JavaScript to React.JS, Bootstrap, Tailwind and SASS.

Online Shop

That was a challenging project at start. I used React.JS, Redux Toolkit, HTML5 and Tailwind. The first stage was to design a User Interface layout. Then, we categorized all the products and designed Administrator panel and cart. All the details is accessible via My Github.

BootCamp Website

This is a sample website. I just used HTML and Bootstrap to design a responsive website. It is accessible from my Github.

EDUCATION

Master in Hydraulic Structures

Shahid Chamran University of Iran • 2014–2017

Bachelor of Science in Civil Engineering

Shahid Chamran University of Iran • 2009–2013

CERTIFICATIONS

Certified Front-End Web Developer

Maktab Sharif (+420 hours)
